# HSBC Bank Malta p.I.c. Half-Yearly Results for 2015

The condensed interim financial statements have been extracted from HSBC Bank Malta p.l.c.'s (the 'bank') and its subsidiary undertakings (collectively referred to as the 'group') unaudited management accounts for the six month period ended 30 June 2015. These condensed interim financial statements are being published in accordance with Chapter 5 of the Listing Rules issued by the Listing Authority and the Prevention of Financial Markets Abuse Act, 2005.

# **Review of Performance**

- Profit before tax of €36m for the six months ended 30 June 2015. The performance was €4m lower than for the same period last year but was higher than for the second half of 2014. Net operating income was up 3% year-on-year, however, higher costs and loan impairment charges contributed to the decline in the first half profits.
- Profit attributable to shareholders of €24m for the six months ended 30 June 2015 resulting in earnings per share of 6.6 cents compared with 7.1 cents in the same period in 2014.

Statements of Profit or Loss and Comprehensive Income for the period 1 January 2015 to 30 June 2015

- Common equity tier 1 capital ratio of 11.5% as at 30 June 2015, up from 10.6% at the end of 2014.
- Cost efficiency ratio of 55.6% for the six months ended 30 June 2015, compared with 53.2% for the same period in 2014. Managed costs were well controlled; however total costs increased as a result of new regulatory costs, continued investment in risk and compliance staff and additional expenses in relation to outsourced services.
- Return on equity of 10.5% for the six months ended 30 June 2015, compared with 11.6% for the same period in 2014.
- Total assets of €7,682m at 30 June 2015, up €483m, or 7%, compared with 31 December 2014.
- Customer accounts of €5,198m at 30 June 2015, up €331m, or 7%, compared with 31 December 2014.

#### Fair values of financial assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following table sets out the fair values of financial assets and liabilities as at the reporting date.

Fair values are determined according to the following hierarchy:

- a) *Level 1 quoted market price:* financial instruments with quoted prices for identical instruments in active markets.
- b) Level 2 valuation technique using observable inputs: financial instruments with quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in inactive markets and financial instruments valued using models where all significant inputs are observable.
- c) *Level 3 valuation technique with significant unobservable inputs:* financial instruments valued using models where one or more significant inputs are unobservable.

The valuation techniques utilised in preparing these condensed interim financial statements are consistent with those applied in the preparation of financial statements for the year ended 31 December 2014. There were no transfers between levels of the fair value hierarchy during the period under review.

Fair values of financial assets and liabilities carried at fair value and basis of valuation:

The collective investment schemes categorised in Level 3, consist of shares in alternative funds which are unlisted and have illiquid price sources. In view of no quoted market prices or observable inputs for modelling their value, the fair value of the shares held is derived using the net asset value as sourced from the respective custodians. The uncertainty in utilising the net asset value lies in the availability of the unaudited financial statements of the alternative funds are as at 30 June 2015. The latest available financial statements of the alternative funds are as at 31 December 2014 and are accompanied by an unqualified audit opinion.

	57,426	58,839	53,009	54,278

The fair values of these assets are determined under Level 3 of the fair value hierarchy. The unobservable inputs used to determine the fair value of property and investment property are the rental market going rates. A discount factor is added to cover property, depreciation and tenant risk where applicable.

#### Fair values of financial assets and liabilities not carried at fair value

Certain financial assets and liabilities are either carried at amortised cost or cost less impairment. The fair values of these financial assets and liabilities are not disclosed given that the carrying amount is a reasonable approximation of the fair value because these are either re-priced to current market rates frequently or are short-term in nature.

The following table sets out the carrying amounts and fair values of financial assets and liabilities not carried at fair value:

	Group		Bank

#### Asset encumbrance

As

Pro Inv

The disclosure on asset encumbrance is a new requirement introduced in Banking Rule 07 transposing the provisions of the EBA Guidelines on Disclosure of Encumbered and Unencumbered Assets (EBA/GL/2014/03).

The objective of this disclosure is to facilitate an understanding of available and unrestricted assets that could be used to support potential future funding and collateral needs. An asset is defined as encumbered if it has been pledged as collateral against an existing liability, and as a result is no longer available to the group to secure funding, satisfy collateral needs or be sold to reduce the funding requirement.

The disclosure is not designed to identify assets which would be available to meet the claims of creditors or to predict assets that would be available to creditors in the event of a resolution or bankruptcy.

The collective investment schemes categorised in Level 3 are financial assets held to cover linked liabilities. The corresponding liabilities to customers under investment contracts in relation to these investments are also categorised in Level 3. Investment risk on these Level 3 assets is borne by the policyholder as it was the decision of the policyholder to invest in these assets.

#### **Financial investments**

There were no movements during the period under review.

These investments consist of shares in unlisted companies, which have illiquid price sources. In view of no quoted market or observable inputs for modelling their value, the fair value of the shares held is derived using the net asset value of the respective companies as reported in the latest available financial statements.

Any changes in the unobservable inputs of both classes of financial assets categorised in Level 3 are not considered to result in significantly higher or lower fair value measurement, given that the amounts invested are considered to be immaterial.

The following non-financial assets are also measured at fair value. Freehold and long leasehold properties including investment properties are remeasured to fair value on the basis of their existing use. Revaluations are carried out by professionally qualified architects with sufficient regularity such that the carrying amount does not materially differ from that which would be determined using fair values at the reporting date.

103 438

The local group does not encumber any of the collateral received or any of its own debt securities issued. As at 30 June 2015, the local group did not have any outstanding liabilities associated with encumbered assets and collateral received.

The bank undertakes the following types of encumbrance:

i. Pledging of debt securities against the provision of credit lines by the Central Bank of Malta.

ii. Pledging of debt securities in favour of the Depositor Compensation Scheme.

#### Segmental analysis

#### a) Class of business

The group's segments are organised into three global businesses: Retail Banking and Wealth Management, Commercial Banking and Global Banking and Markets. The group comprises HSBC Bank Malta p.l.c. and its subsidiaries. The segments presented reflect the way the Chief Executive Officer, as chief operating decision-maker, reviews financial information in order to make decisions about allocating resources and assessing performance. Information provided to the chief operating decision-maker is measured in accordance with IFRSs as adopted by the EU.

b) *Geographical segments* 

The group's activities are carried out within Malta. There are no identifiable geographical segments or other material concentrations.

#### c) Products and services

HSBC Bank Malta p.l.c. provides a comprehensive range of banking and related financial services to its customers. The products and services offered to customers are organised by global business.

- Retail Banking and Wealth Management ('RBWM') offers a broad range of products and services to meet the personal banking and wealth management needs of individual customers. Typically, customer offerings include personal banking products (current and savings accounts, mortgages and personal loans, credit cards, debit cards and local and international payment services) and wealth management services (insurance and investment products, global asset management services and financial planning services).

Basis of Preparation

The condensed interim financial statements have been extracted from HSBC Bank Malta p.l.c.'s (the 'bank') and its subsidiary undertakings (collectively referred to as the 'group') unaudited management accounts for the six months period ended 30 June 2015. These condensed interim financial statements are being published in accordance with Chapter 5 of the Listing Rules issued by the Listing Authority and the Prevention of Financial Markets Abuse Act, 2005.

The condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting, adopted by the EU. They do not include all the information required for a complete set of annual financial statements, and should be read in conjunction with the financial statements for the year ended 31 December 2014.

There were no new standards adopted during the period ended 30 June 2015. However, the group adopted interpretations and amendments to standards which had an insignificant effect on the interim consolidated financial statements.

- Commercial Banking ('CMB') offers a broad range of products and services to serve the needs of our commercial customers, including small and medium sized enterprises, mid-market enterprises and corporates. These include credit and lending, international trade and receivables finance, treasury management and liquidity solutions (payments and cash management and commercial cards) and commercial insurance. We also offer our customers access to products and services offered by other global businesses, for example Global Banking and Markets, which include foreign exchange products, raising capital on debt and equity markets and advisory services.

– Global Banking and Markets ('GB&M') serves primarily as Treasury, managing the interest rate and liquidity risk of the bank. GB&M also provides tailored financial solutions to corporate and institutional clients. The capabilities include financing, advisory and transaction services, and a markets business that provides risk management solutions covering interest rates, foreign exchange and commodities.

The accounting policies applied in these condensed interim financial statements are the same as those applied by the group in its financial statements as at and for the year ended 31 December 2014.

As required by IAS 34, Interim Financial Reporting, adopted by the EU, these interim financial statements include comparative statements of financial position information at the previous financial year end and comparative profit or loss statements and statements of profit or loss and comprehensive income information for the comparable interim periods of the immediately preceding financial year.

Related party transactions with other members of the HSBC Group covering the period 1 January to 30 June 2015 have increased mainly as a result of new services offshored. Other than that, these transactions did not materially affect the performance of the period under review and financial position at the end of the reporting date.

Certain comparative amounts have been reclassified to comply with the current period's presentation.

# Commentary by Mark Watkinson, Chief Executive Officer, HSBC Bank Malta p.l.c.:

HSBC Bank Malta p.l.c. reported a profit before tax of €36m for the six months ended 30 June 2015 compared with €40m for the same period in 2014. This performance reflected the continuing low interest rate environment as a result of record low European Central Bank rates, muted commercial lending growth and an increase in costs as a result of compliance investment and new regulatory charges. In addition, the 2014 performance benefited from a bigger gain on the sale of securities.

All three main business lines, Retail Banking and Wealth Management, Commercial Banking and Global Banking and Markets, were profitable during the six month period under review.

Net interest income increased to €60m compared with €58m in the same period in 2014. The increase in net interest income was primarily driven by a lower interest expense as deposits rates reduced. Interest income decreased as well as a result of diminishing lending margins. Interest income on investment portfolio declined as proceeds of higher yielding maturing bonds were re-invested at the lower prevailing rates.

Net fee income was up 2% compared with the same period in 2014 primarily as a result of higher asset management fees in the insurance subsidiary. Custody and stock brokerage fee income declined following the winding-up of these businesses in early 2014. Credit fees reduced as fewer credit facilities were sanctioned in the first half of 2015 compared with the same period in 2014.

HSBC Life Assurance (Malta) Ltd. reported a profit before tax of €7m compared with €6m in the first half of 2014. The results in 2015 benefited from a recovery in yield curve, release of model uncertainty reserve and new revenue earned on the portfolio of investment contracts transferred to the company at the end of 2014.

A net gain on disposals of available-for-sale securities of  $\notin 0.4$ m was reported for the six months ended 30 June 2015, compared with  $\notin 1.5$ m for the same period in 2014.

Operating expenses of €50m were €4m, or 7%, higher than the first half of 2014 largely due to compliance investment, regulatory fees and costs attributable to regulatory obligations (new Single Supervisory Mechanism fees and the new requirement for contribution to the Single Resolution Fund) and the increased cost of outsourced services as a result of currency fluctuations and new services related to the transferred insurance portfolio. Excluding these items, expenses were well controlled and marginally above the comparable period in 2014.

Net impairment charges of  $\notin 3.6m$  were  $\notin 2m$  higher than in the first half of 2014 but considerably lower than in the second half of 2014. Overall asset quality remains satisfactory with a high percentage of tangible security held against the overall loan portfolio.

Net loans and advances to customers were €3,249m, €24m lower than at 31 December 2014. The growth in mortgage balances supported by government incentives for first time buyers was offset by the reduction in corporate lending where repayments were higher as a result of the persistent low interest rate environment. The lending pipeline remains robust and newly sanctioned loans amounted to €462m reflecting the bank's continued support of the local economy. The second tranche of the Malta Trade for Growth fund of €75m was launched in June 2015, aimed at helping Maltese companies internationalise their business.

Customer deposits increased by €331m to €5,198m reflecting the growth in both retail and corporate deposits. As deposit rates decrease, the shift from longer-dated to shorter-dated deposits continues.

The bank's available-for-sale investment portfolio is composed of highly-rated paper and is conservatively positioned.

The bank's liquidity position was further strengthened with an advances-to-deposits ratio of 62% compared with 67% at 31 December 2014.

The bank continued to strengthen its total CET 1 ratio to 11.5% from 10.6% at 31 December 2014. Total capital ratio increased to 13.3% compared with 13% at 31 December 2014.

Mark Watkinson, Director and Chief Executive Officer of HSBC Malta, said: "Operating conditions remain difficult. The European Union has been unsettled by the challenges around Greece, levels of liquidity in the market remain very high, the European Central Bank continues to pay negative rates of interest on deposits and regulatory fees have seen considerable rises, particularly with respect to deposit compensation and bank resolution fund schemes. Despite these challenges, the three main business lines all operate profitably and a continuing improvement in the local economy will be positive for our business over time. The Bank remains focused on continuing its investment in its local franchise and leveraging the opportunities as Malta becomes increasingly globally connected, sitting astride the world's single largest trade route connecting Asia, the Middle East and Europe."

"I would like to take this opportunity to thank our staff, Directors and shareholders for their commitment, hard work and support during the first half of 2015." The Board has declared an interim gross dividend of 5.1 cents per share (3.3 cents net of tax). This will be paid on 10 September 2015 to shareholders who are on the bank's register of shareholders at 14 August 2015.

### Statement pursuant to Listing Rule 5.75.3 issued by the Listing Authority

I confirm that to the best of my knowledge:

• the condensed interim financial statements give a true and fair view of the financial position of the group and the bank as at 30 June 2015, as well as of their financial performance and cash flows for the period then ended, in accordance with IAS 34 Interim Financial Reporting, adopted by the EU; and

• the commentary includes a fair review of the information required under Listing Rule 5.81 to 5.84.

Mark Watkinson, Chief Executive Officer
