HSBC Malta Foundation supports the Down Syndrome Association

HSBC Malta Foundation is proud to be partnering with the Down Syndrome Association to organise computer training sessions and a wide range of life skills support for its student members. In addition to computing, the programme includes employability skills such as CV writing, interview skills, and job finding support. The Association considers that having a job, earning their own money, shopping, and paying their own bills all play a substantial role in enabling its members to live a full and independent life.
